ESB ecars Fast Charge Point Rollout Plan Announced in Ireland

Thirty service stations will be providing fast charging by the end of 2011. Journeys between inter-urban centres now possible with fast charging.

ESB ecars (http://www.esb.ie/main/ecars/news-and-events.jsp) has announced detailed plans for the rollout of fast charge points in service stations across the country from next month.

Under agreements with Topaz, The Maxol Group and Lidon Limited, a number of fast charge points will be available in service stations along inter-urban routes from May and throughout the summer, enabling drivers to 'power up' electric cars from zero to 80% of their capacity in less than 30 minutes.
