- 4 QC's operational 1-11-2011
- Expected total of 7-8 in 2012
- Amsterdam contract with 
- Three operating companies
- Complementary infrastructure to: 250 regular public chargers (now), up to 2000 regular chargers in 2013
- Now: focus on specific user groups

Quick Chargers in NL

hoofddorp

breda

zoetermeer

Challenge in NL

- No leading national authority or institution
- Many companies involved

Challenges:

- How to create ONE network for EV-drivers?
- How to deal with pressure on business case?

Implementation and User WG

Tasks:

- To answer questions concerning implementation issues (members, public bodies, network operators, etc.)
- To attend to the user perspective in Quick Charging and provide feedback from their point of view;
- To facilitate and aggregate knowledge and experience of business models, payment mechanisms, etc.

Implementation and user WG

Activities:

- Make POI-data or a QC-map publicly available, with standard information
- Aggregate examples of business models of QC-schemes in Europe
- Disseminate information useful in contracting QC's and services
-

Implementation and user WG

Members:

- Public bodies
- Service providers
- Infra providers
- EV consumer bodies
- Utilities
-
