ASSOCIATION & PROTOCOL

MARCH 2018

CHAdEMO ASSOCIATION & PROTOCOL

In a nutshell

Who we are

We are an e-mobility collaboration platform around CHAdEMO DC charging protocol. As an ecosystem of companies offering CHAdEMO-related products and services we work together to promote and enable electric mobility on a global scale.

What we do

WE DEVELOP THE PROTOCOL adapting it to the market needs and our members' requests.

WE CERTIFY CHARGERS ensuring compatibility between the infrastructure and the EVs.

WE PROMOTE FAST CHARGERS by actively disseminating their benefits and data through various communication channels.

About CHAdEMO Protocol

CHAdEMO is a DC charging protocol currently enabling EV charging with power from **6kW to 200kW (400A x 500V)** with a possibility from **6kW to 400kW (400Ax1000V)** in preparation. It follows 4 principles:

SAFETY

CHAdEMO believes that in the context of high power, electrical safety is crucial and mandates strict guidelines in designing chargers.

FUTURE-PROOF

CHAdEMO is Smart Grid-ready through its bi-directional charging capability. It is also compatible with any local or optional functions beyond charging.

EASE OF APPLICATION

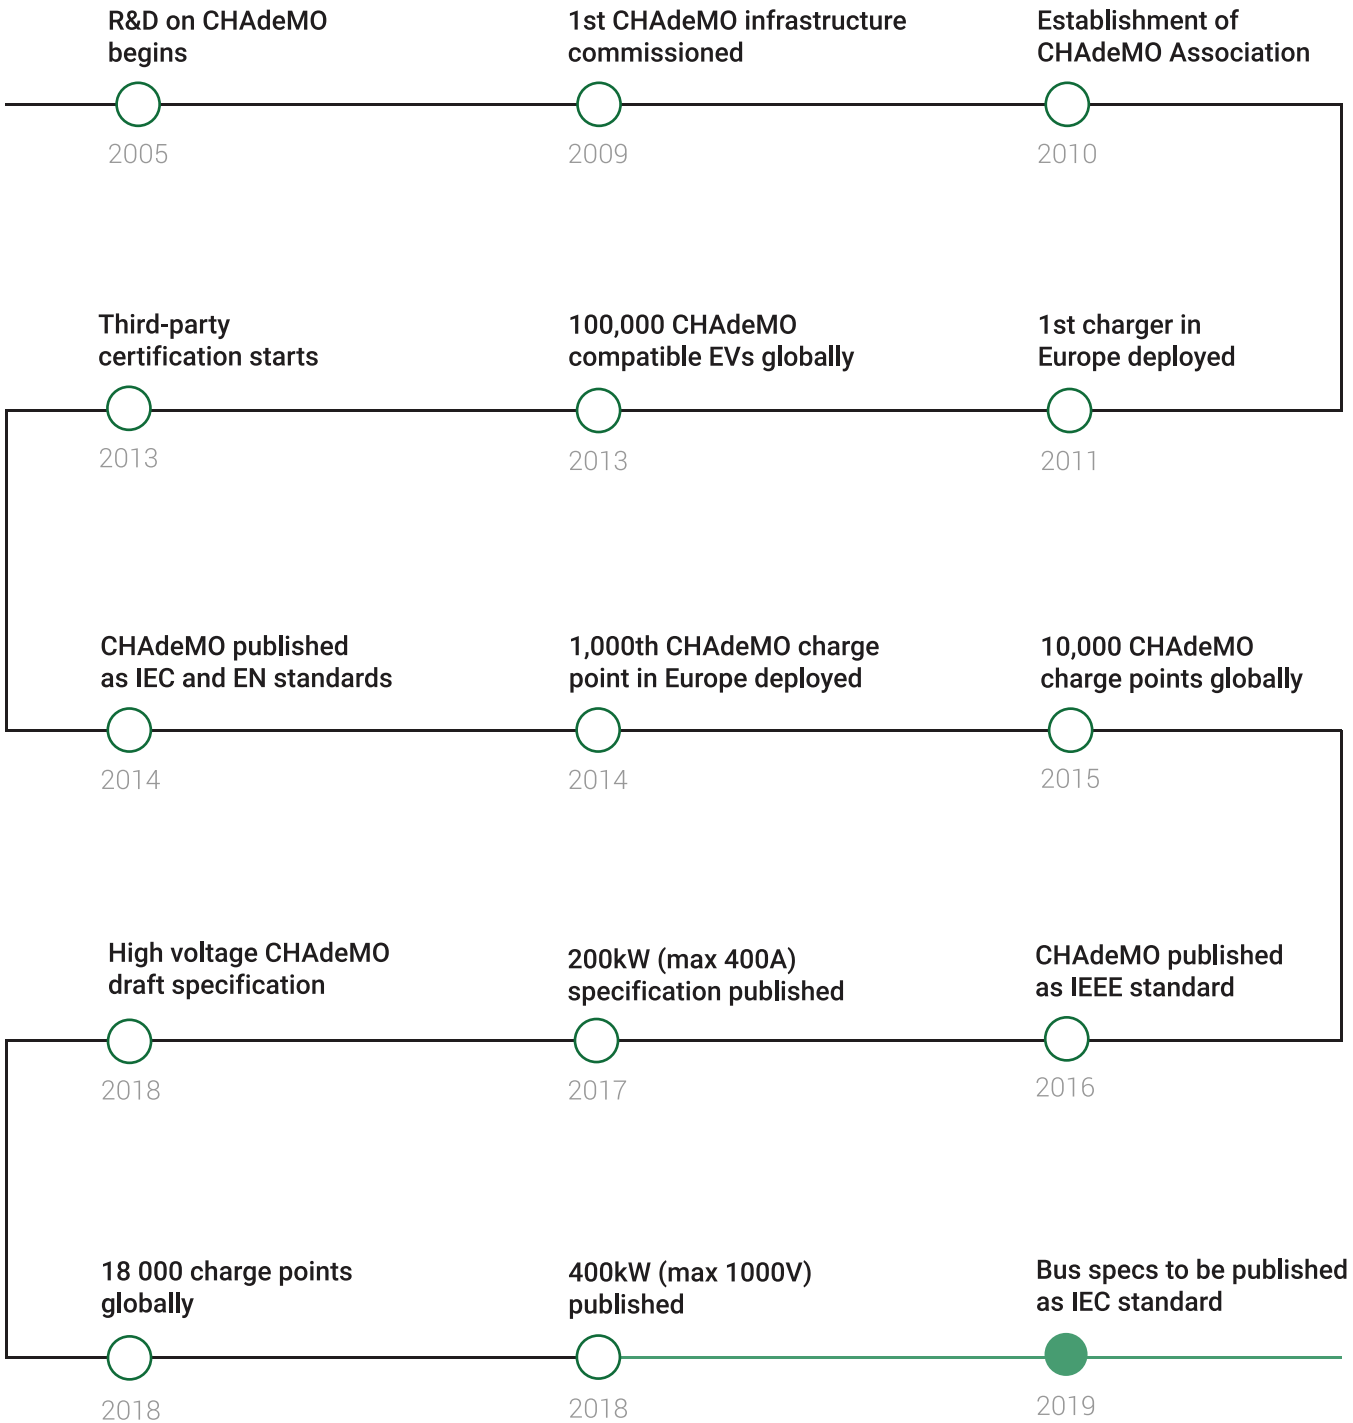

The protocol works with CAN communication, making its integration with the rest of the car easy and reliable.

UNIFORMITY

CHAdEMO connector is identical across the globe and is a stand-alone plug that can be with or without an AC connector. It saves costs for EV makers and enables cross-continental EV travels.

ELECTRIC JOURNEY OVER A DECADE

400kW

To respond to the ever-increasing capacity of EV batteries and to keep the charge time to a minimum, development of the next generation CHAdeMO for higher voltage is on-going.

LEADING BY NUMBERS

1 The largest global installation base

CHAdEMO-equipped chargers are the most popular EV fast charging infrastructure choice in the world.

69

COUNTRIES ON 5 CONTINENTS HAVE CHAdEMO CHARGERS

18 000

CHAdEMO CHARGE POINTS ARE AVAILABLE TO EV DRIVERS GLOBALLY

CHAdEMO charge point evolution

2 The largest number of certified charger models

First generation CHAdeMO chargers hit global roads in 2010. Since then, the portfolio of certified chargers increased to 240. All leading charger manufacturers as well as a broad range of SMEs providing fast charging infrastructure are our members, testimony to the Association's reach and global recognition.

3 CHAdeMO compatible EVs in the market

CHAdeMO leads in the number of EV models using the protocol, including some of the most popular EVs on the market.

CHAdeMO compatible EVs

4 Largest member base as fast charging coalition

The DC charging ecosystem around CHAdeMO brings together top players from various sectors in e-mobility: automakers, utility companies, operators, manufacturers of chargers, connectors, and battery management systems. Together, they make sure CHAdeMO develops according to market needs and continues its growth.

400

GLOBAL MEMBERS

“ By enabling drivers to charge faster and encouraging the deployment of the infrastructure CHAdeMO has been instrumental in promoting electric mobility.

STANDARDISED AND CERTIFIED

A European and international standard

Confirming its global relevance, CHAdeMO has been published as various international standards by IEC, CENELEC (Europe) and IEEE (US).

EN

61851-24,
61851-23,
62196-3

IEEE

2030.1.1

The European Union recognises the importance of CHAdeMO by explicitly endorsing multi-standard chargers in its directive on the deployment of alternative fuels infrastructure.

“ *Interface to charge electric vehicles could include several socket outlets or vehicle connectors as long as one of them complies with the technical specifications set out in this Directive, so as to allow multistandard recharging.* ”

Recital 33, Directive 2014/94/EU

Unique DC charging certification system

One of its kind dedicated to DC charging for EVs, the impartial and transparent process enables any company to build, certify and sell CHAdeMO devices. CHAdeMO certified means the charger conforms to the highest safety standards mandated by CHAdeMO and is fully compatible with all CHAdeMO EVs.

SPECIAL FOCUS

Vehicle to X (V2X) already a reality at CHAdeMO

CHAdeMO protocol detailing V2X extension is available to Members. Certification of V2H/L chargers is already available.

A crucial element for a switch to renewables, V2X technology enables using EVs as both vehicles and mobile batteries. With V2X devices, EVs can store energy from home PV panels to use later or feed to the grid and help balance the energy supply, all the while providing financial benefits to the EV owner. Currently, CHAdeMO EVs are the only mass-produced and marketed cars capable of V2X.

“ Worldwide revenue from V2G frequency regulation will grow from less than \$900,000 annually in 2013 to \$190.7 million by 2022.

High power CHAdEMO connection tests

High Power

8

AUTOMAKERS

7

CHARGER MANUFACTURERS

Increasing the stipulated power from 60kW to 200kW with the publication of CHAdEMO 1.2, the first connection tests of high power CHAdEMO took place in Ise, Japan in March 2017.

Eight automakers and seven charger manufacturers participated with five test vehicles and three chargers. The event ended successfully with a public demonstration to the media reps.

Upcoming next in 2018 is a connection test event in Europe, where we test products that comply with CHAdEMO's high power charging protocol (up to 400A). Stay tuned!

CHADEMO ASSOCIATION

Working with and for the members

CHAdEMO develops the protocol but also provides a variety of services that help its members promote their products and keep them updated with the evolution of the market/protocol.
